REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claims 1-7, 18-20, 28 and 29 are allowable over the prior art of record because the prior art of record does not teach a component of a vacuum deposition apparatus or an apparatus comprising the component for the vacuum deposition apparatus wherein the component is comprised of a spray deposit coated on a surface of the component body and having surface roughness in which a mean spacing S of tops of local peak of profile is in a range from 50 to 150 μm , a distance from a mean line to a bottom of profile valley line R_v is in a range from 20 to 70 μm , and a distance from a mean line to a top of profile peak line R_p is in a range from 20 to 70 μm , wherein a difference in distance between the top of profile peak line R_p and the bottom of profile valley line R_v ($R_p - R_v$) is in a range from -11 to 6 μm so that a film adhered on the surface of the surface of the spray deposit grows with a stable columnar structure.

Claims 24, 25 and 30-33 are allowable over the prior art of record because the prior art of record does not teach a target apparatus comprising a target body and a spray deposit coated on a non-erosion area of the target body and having surface roughness in which a mean spacing S of tops of local peak of profile is in a range from 50 to 150 μm , a distance from a mean line to a bottom of profile valley line R_v is in a range from 20 to 70 μm , and a distance from a mean line to a top of profile peak line R_p is in a range from 20 to 70 μm , wherein a difference in distance between the top of profile peak line R_p and the bottom of profile valley line R_v ($R_p - R_v$) is in a range from
